

COMPANY PROFILE

are you taking risks ?

BESECURE founded in 2006 to address new compliance requirements and increasingly complex issues concerning the security of information assets. BESECURE is owned and managed by experienced IT Security professionals that have gained professional experience working in the field for many years for large consulting firms, IT system integrators, service providers and security vendors. BESECURE established first office in Greece in 2006 targeting local and Balkan markets. Within 2009 BESECURE opened the Cyprus office targeting Cyprus and Middle East markets.

BESECURE, focuses solely on establishing organization-wide optimal security postures for its clients following its own Security Life Cycle Framework. BESECURE's security expertise is all-encompassing and includes regulatory compliance services, managed security services, security integration services and security trainings.

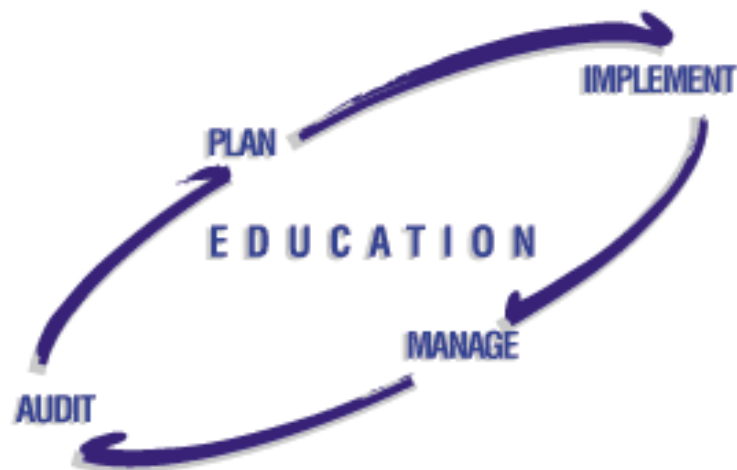

BESECURE acts as a trusted security advisor to customers from government, financial, telecommunications and enterprise markets throughout Southeast Europe and Middle East, helping them plan, implement and review security management strategies focused on people, process and technology resources. These strategies help reduce the cost and complexity in ensuring the confidentiality, integrity and availability of mission-critical information systems.

BESECURE offers a comprehensive portfolio of Information Security services. Following our Security Life Cycle Framework, we are able to help our customers address each critical component of their security program. BESECURE provides complete solutions rather than common "silver bullet" technology approaches. These include the policy, process, and organizational elements required to truly leverage technology.

Information Security Services & Solutions

Our Enterprise Security Services are built around a Security Life Cycle Framework, which emphasizes the on-going process of managing an organization's security requirements. The Security Life Cycle Framework also allows us to advise our clients in a structured and consistent approach, which results in better decision-making.

Security Lifecycle Framework

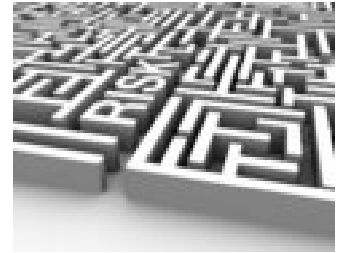

BESECURE believes that Information Security is a process, not a product. Realizing this important aspect BESECURE is providing frequent security awareness through seminars and newspapers articles. Along with the corporate mission statement, BESECURE's guiding strategies are as follows

- Focused on Security Solutions only and steer away from other IT services.
- Objective selection of vendors of security products and service.
- Partner with vendors, focused only in one category/area of security
- Partner with vendors willing to invest in supporting the customers in the region

Governance Risk & Compliance Services

Information Assurance is a strategic approach to enabling and securing an organization's information capital. In today's business environment, stakeholder value can be too easily and often unwittingly damaged by information-based risks. Your information capital needs to be compliant, secure, available, reliable and accurate. Without this assurance, there is a real danger of financial loss or damage to reputation. BESECURE has an outstanding pedigree in information security and infrastructure services. Market leading solutions and services in the area of Governance

Risk and Compliance include:

- Information Security Risk Assessments
- Information Security Management Framework Implementations – ISO27001
- Enterprise Security Program Reviews and Development
- Enterprise Security Architecture Planning
- Network Vulnerability and Penetration Testing
- Information Security Policies, Standards and Guidelines
- PCI Data Security Standard Consultancy.

Governance Risk & Compliance Solutions

BESECURE in cooperation with strategic partners offers a range of Governance Risk & Compliance enterprise security solutions that address key customer needs and go beyond traditional security countermeasures. BESECURE Governance, Risk, and Compliance solutions include:

- Access Control
- Application Security
- Content Monitoring
- Data Loss Prevention
- Endpoint Security
- Intrusion Prevention
- Log & Event Management
- Secure Remote Access
- Security Audititng

Managed Security Services

Pressure continually mounts on IT security costs. Threats multiply in nature and number, while corporate governance means that compliance issues are constantly raised. Against this backdrop, there's a need to support infrastructure round the clock – either on your own, or with outside help. Having specialized in Managed Services we bring an insight and deeper understanding that offer clear advantages. BESECURE Managed Security Services include:

- Managed VPN Security Services
- Managed Vulnerability Assessment Services
- Managed Gateway Security Services
- Managed Intrusion Prevention Services
- Managed Web & Email Content Security Services.

Security Training Services

BESECURE believes that comprehensive on-going education for executive management, security and system administrator and end-user levels is critical to maintain and enhance an organization's awareness and understanding of new security threats, countermeasures and risk mitigation strategies. BESECURE provides effective vendor-neutral training courses to cater to specific knowledge transfer needs in seminar, classroom and workshop formats. BESECURE Training Services include:

- Executive Management Awareness Briefings
- Advanced Computer and Network Security Trainings
- Holistic Information Security Practitioner Trainings

BESECURE has been accredited from HISP Institute to offer the Official HISP Certification Course. The HISP course is the only integration course that provides practical education on the integration of best practices for Information Security Management, Information Systems Auditing and multiple Regulatory Compliance requirements and how to map multiple regulatory and contractual requirements to the internationally accepted best practices framework of ISO/IEC 27002:2005 and ISO/IEC 27001:2005 standard.

Qualifications and Expertise

Organizations are constantly facing emerging information security threats that have to mitigate, balancing the properly safeguards against the overall business value. Understanding our customers

requirements is an important aspect of our commitment. To achieve an objective measurement of our competence, except our strong background of combined consulting, implementation and training experience, our team holds industry recognized certifications from the most well respected vendor neutral institutions such as International Information Systems Security Certification Consortium (ISC)2 and SANS (SysAdmin, Audit, Network,

Security) Institute. BESECURE is committed to provide ongoing training and periodic recertification to its team members to be always up to date with the technology changes, new legislations and industry specific security requirements to meet our customers expectations. BESECURE adopts the methodology of the HISP Institute to implement a holistic framework of Information Security and comprises the largest number of certified HISP in Greece and the Balkans.
