Security & Compliance Solutions

A unique information security and regulatory compliance certification course that provides IT security professionals with the best practices required to limit the risk of security and regulatory breaches.

Certification Course Overview

The HISP Training & Certification program is managed by the HISP Institution and was created to address the current shortage of skilled Information Security and Compliance professionals. HISP Institute promotes a holistic approach to information security program management by providing certification opportunities in information security, information assurance and governance.

HISP Certification course is the only integration course that provides practical education on the integration of best practices for Information Security Management, Information Systems Auditing and multiple Regulatory Compliance requirements and how to map multiple regulatory requirements to the internationally accepted best practices framework of ISO/IEC 17799:2005 and the ISO/IEC 27001:2005 standard. The class covers the mapping of ISO/IEC 17799:2005 with COBIT, COSO and ITIL then explains a methodology to map regulations such as UK Data Protection Act, EU Directive on Privacy, HIPAA Security, FFIEC, GLB Act, FISMA (NIST 800-53/FIPS 200), Sarbanes-Oxley Act (Security), FACT Act, PCI Data Security (Visa CISP), California SB-1386, Canadian Bill C-198, OSFI, PIPEDA, PIPA, PHIPA to the ISO 17799:2005 framework.

The organizer

BESECURE has been certified as an Authorized Training Partner for the region from eFortresses Inc, which is the author of the HISP Certification Courseware.

HISP: Holistic Information Security Practitioner

- Information Security Consultants or Third Party Auditors.
- Auditors (External and Internal).
- Information Security Officers.
- IT Managers/Directors.
- Privacy/Compliance Officers

from all industries.

About HISP designation

HISP designation is gaining international recognition from the industry with hundreds of attendants and certified professionals registered on a series of public and private certification courses being delivered in Europe and USA. The HISP designation means that:

- The professional has a good grounding in International best practices for Information Security & Audit Governance as well as general IT Governance i.e. ISO 27002, ITIL, CobiT and COSO.
- The professional takes a Holistic risk management approach to Information Security.
- The professional is a hybrid Information Security professional, well balanced between technical and business skills.
- The professional can function effectively in the capacity of a CISO, CCO by tackling the challenge of Information Security as a business concern that is not solved by technology alone, but by People, Process and Technology.
- The professional is able to map International best practices of ISO 27002, ITIL, CobiT and COSO to current and future regulatory compliance requirements.

About HISP Institute

Holistic Information Security Practitioner (HISP) Institute (HISPI) is an independent certification organization consisting of volunteers that are true information security practitioners, such as Chief Information Security Officers (CISOs), Information Security Officers (ISOs), Information Security Managers, Directors of Information Security, Security Analysts, Security Engineers and Technology Risk Managers from major corporations and organizations. HISPI promotes a holistic approach to information security program management by providing certification opportunities in information security, information assurance and governance.

The objectives of HISPI include:

- To bridge the current gap between existing professional certification programs by proactively promoting the need to develop comprehensive and holistic information security programs amongst information security, audit and compliance professionals representing various sectors internationally.
- To promote cost-effective training and certification to information security, audit and compliance professionals, particularly Public Sector and Higher Education employees, where budget constraints can be a barrier to obtaining such quality training and certification.
- To provide a vendor neutral forum that will facilitate the sharing of knowledge, ideas and other positive initiatives for enhancing the current state of information security in various sectors internationally.
- To research and develop an integrated system for widely accepted best practice frameworks that are applicable to Information Security such as ISO/IEC 27002, ISO/IEC 27001, COBIT, COSO, ISO/IEC 20000 (ITIL), NIST Guidelines, FIPS 200 (NIST 800-53).
- To foster collaborative efforts across various sectors internationally, particularly government, law enforcement and commercial sector.
- To foster a positive code of ethics amongst information security, audit and compliance professionals.
- To reduce the cost of meeting legal, regulatory and contractual requirements pertaining to information security, across various sectors internationally.
- In addition to the existing partnership with British Standards Institute (BSI) Americas, to also partner and collaborate with other reputable organization.
